

## SUITE OF STANDARD FEATURES FOR THE S-NET HOSTED PHONE SYSTEM

<b>Scalability</b>	Virtually unlimited growth options from 6 phones to 6000
<b>Geographical Freedom</b>	Employees are connected wherever they have a broadband connection
<b>Lower Cost of Ownership</b>	Over time, hosted solutions save money. Return on investment within the first year.
<b>Business Continuity</b>	Calls can be instantly redirected to other locations in case of emergency or natural disaster.
<b>Cellphone Integration</b>	Incoming calls can ring simultaneously on cell phones and office phones.
<b>Call Center</b>	Statistically distribute incoming calls to agents, call monitoring, advanced reporting capabilities, multiple messages, and call queuing
<b>Voice Mail to E Mail</b>	All voice messages can be received as email files with virtually unlimited storage.
<b>User Oriented Web Management Interface</b>	Instant access to both inbound and outbound calling records by user. Voice messaging and call forwarding can be easily administrated at the user level via a secure web based tool.
<b>Follow Me</b>	Incoming calls ring sequentially to different telephone numbers.
<b>Multi User Conference</b>	Capabilities include built-in conference bridge.
<b>Telecommuting</b>	Remote workers can work off site with full voice connectivity, as if they were on site, including paging, intercom and inbound/outbound calling
<b>Soft phone Support</b>	Using a headset, remote users can use software based applications over PCs, laptops, PDAs and certain cell phones to connect and process calls.
<b>Direct Inward Dialing</b>	Each set has its own unique 10 digit telephone number.
<b>True Number Portability</b>	Telephone numbers can be assigned regardless of rate center or geographic location. Never change a phone number again.
<b>WiFi Connectivity</b>	Wherever you have a wireless internet connection, you can connect to your office.
